

## Display Board Information (D & S Inspection)

Note: ARASE affiliates with the Society for Science and the Public (SSP). We follow the Display and safety (D & S) regulations and regulations outlined by SSP. The requirements and D & S regulations also apply to the Texas Science and Engineering Fair (TSEF).

### Maximum Size of Display Board: (Table Model or Floor Model)

- Depth (front of table to back of the board): 30 inches.
- Width (side to side): 48 inches.
- Height (floor to top): 108 inches. If the project is a table model, the table is included in the measurement. This also includes the title board.

### Requirements Display Board:

The STAMPED Official Abstract/Certification Form goes on the **upper left-hand side** of the board or **standing up right** on the table with a support. **NOT** flat on the table. If placed on the board, it should be the first item. **DO NOT** use the title "Abstract" on the board. It can also be placed in a plastic cover and taped to the edge of the table so that it hangs from the table.

If the following SRC Forms were applicable to the study, they should be displayed be **vertically** on the table, on the board, or be placed in a plastic cover and taped to the edge of the table:

- Form (1C) Regulated Institutional/Industrial Setting
- Form (7) Continuation Projects

Science Project Report **MUST** be at the DISPLAY (in folder, binder, stapled or bound). It needs to **STAY** at the DISPLAY when students are dismissed. The Blue judges need to see it.

Photographs, diagrams, or flow charts can be used to describe the method or results.

Photographs, diagrams, charts, graphs, etc. need to have a caption and figure number.

Photographs and/or visual depictions need to have a CREDIT LINE or origin. "Photograph taken by ..." or "Image taken from..." One credit line is sufficient if taken by one person or taken from the same source.

Photos of Human Participants are allowed **ONLY IF** there is a PHOTO CONSENT to display the photo. Student researcher **does not need the consent nor** cover the face if in photo.

### Items That DO NOT Go On The Display Board:

Bibliography **DOES NOT** go on the board. It goes in the report.

Acknowledgments **DO NOT** go on the board! Have them in the science report without names.

### Items NOT ALLOWED at Project or Exhibit:

Refer to the Intel *International Rules and Guidelines*. Go to [www.societyforscience.org](http://www.societyforscience.org). Go to "Student Science" on the Menu. Click on Intel ISEF. Go to Rules, Forms, and Resources. Click on Rules and scroll down to Display and Safety Regulations.

**NOTE:** Use large print (at least larger than 12 font pt.). It is easier for judges to read.

Start the display from the left to the right so the judges can follow the **FLOW** of the experiment like the flow of the report. You can have a photo album and a data log if you wish.
