

NEW for 2017 – 2018:

- New data tables design for most project and review lists
 - More information displayed
 - Faster Display
 - More options for export and column selection
- Improvements to student project steps
 - After teacher review if IRB and SRC are not needed, the project will automatically skip those steps
- Ability for fair directors to fully edit their school's information or move a school under a different fair if they registered wrong. School fair directors now have the same capability
- Improvements to the Teacher Dashboard. It now resembles the Fair Director Dash with options of viewing projects, students winners, export etc. using the fair management window
- New teammate selection operation:
 - Available teammates are now selected from a drop down menu
 - Teammates can be added to a project up until the point that the abstract is complete
- Timeline has been removed for faster page loading
- Review screens (Teachers, SRC and IRB)
 - Now have the ability to add a Form 1C, just like any other form
- Custom email list generator found in Fair Directors Tools under Data Tools
 - Create your own custom lists of e-mail or mailing addresses from any data in your database, including previous years.
- Students now have access to previous year's Research Plan and Abstract in their left hand menu
- Teachers and Fair directors can now view a student's forms via the projects lists without having to login to the student's account
- Winner Project Lists can now be viewed directly in the right hand Fair Management console
- District and Regional SRC Dashboard update:
 - If a fair does not pre-approve projects, that section will not appear on their SRC members Dashboard
 - Post fair review (re-review of winners) will appear on SRC dashboard only if that option is selected by the fair.
